

Peterson Europe

Vehicle lighting solutions

by design, by technology, by quality

In order to better serve our European customers, we established in January 2021 an EU-based subsidiary company – Peterson Europe BV – which is operating from a base in Belgium.

We are therefore able to continue to offer seamless trade with our many EU customers, avoiding the additional costs and bureaucracy that would have occurred following Brexit. With 5000+ SKUs held in mainland Europe, we work in conjunction with 3PL provider, Laebens Logistics, to deliver goods direct to customers across the European Union and can offer the same efficient sales process and timely delivery. Our stock levels held in Belgium are aligned to customer demand / production requirement and we pride ourselves on an industry-leading first pick rate %.

To further support our EU presence, we have a new German speaking Sales and Marketing Manager, Paul Thompson. Please feel free to contact Paul directly:
